SUPPLEMENTARY INFORMATION:

Background

Construction and development of the Project was authorized pursuant to the Act of February 9, 1905, ch. 567, 33 Stat. 714, which is part of the Reclamation Act of 1902, 43 U.S.C. 372 *et seq.*, as amended and supplemented. The Project is located in Klamath County in Oregon, and Siskiyou and Modoc counties in California, occupying portions of the Klamath River and Lost River watersheds within the Klamath River Basin. Major project facilities include Link River, Clear Lake, and Gerber dams. The Project includes approximately 235,000 acres of agricultural lands, although roughly 200,000 acres of land are irrigated annually. In addition, four national wildlife refuges lie adjacent to or within Project boundaries, and receive water from or are associated with Project facilities. Pursuant to a 1956 contract with Reclamation, PacifiCorp operates the Link River Dam and several dams downstream of the Project for hydroelectric power generation. The need for more certainty regarding project operations has been recently demonstrated by drought conditions in 1992 and 1994, listings of species under the Endangered Species Act, and the protection of Tribal trust resources pursuant to the United States' Federal trust responsibility. When completed, the interim plan for long-term operations will supersede annual operations plans and guide Project operations during the adjudication.

Public Scoping Process

Reclamation has developed a "Summary of Klamath Project Operation Issues, January 1999," which documents the issues and concerns that the public has communicated to Reclamation through prior public involvement activities in the Klamath River Basin. During February 1999, Reclamation will solicit public review and comments on the summary to ensure that significant issues have not been overlooked.

Dated: February 5, 1999.

Kirk C. Rodgers,

Acting Regional Director.
